

# Custom Built Long-Life Desktop & Tower PCs *(available with ISA-Slots!)*

## High Quality Performance Designed for Your Applications

Many of our customers rely on ADEK to supply high quality desktop and tower computers that still offer ISA slots and unusual configurations. That's why, in addition to building systems incorporating state-of-the-art components, we still offer systems that offer compatibility with older boards our customers need in their applications.

We use only the highest quality components from companies including Intel, AMD, ASUS, 3Com, Maxtor, IBM, Adaptec and others. We also offer customer software reproduction and custom or generic packaging for higher volume OEM customers.

Before delivery, each system is fully tested and marked with FCC and CE certification for domestic and international use.

So, the next time you're looking for high quality desktop or tower computers, discover the extensive product line available from ADEK .

### Features:
